

Satellite traffic and weather is an important part of my listening day, and I would like to express my concern over possible elimination of this important feature of my satellite radio. I am unable to get this kind of information via the commercial radio waves - period!

I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I, the general public, demand and deserve.

Sincerely, Stephen Jones
